EDUCATION

York University

Bachelor of Arts Honours in Computer Science

Sept 2021 – June 2025

Toronto, Ontario

EXPERIENCE

mentAIimage

Software Developer Intern

Sept 2025 – Nov 2025

Remote

- Developed **frontend features** using **Next.js** and **TypeScript** for **voice and text input**
- Integrated frontend with **FastAPI backend APIs** to display ML sentiment analysis results
- Built a **cloud upload pipeline** using **signed URLs**, **Cloud Storage**, **Pub/Sub**, and **Firestore**
- Implemented **real-time data sync** to reflect **ML sentiment outputs** accurately in the UI

Eagle Insurance

Compliance Analyst

June 2021 – Sept 2021

Hybrid

- Performed **Customer Due Diligence** assessments to ensure **regulatory** and **policy** compliance
- Collaborated with internal teams to resolve **document**-related issues during **client onboarding**
- Supported client onboarding by preparing **Know Your Client** packs for compliance review
- Ensured documentation was **complete**, **accurate**, and properly **labeled** for **audit readiness**

PROJECTS

Booking System for Local Businesses | *React, NestJS, PostgreSQL, Stripe, JWT, Render, Supabase*

github.com/chrispsang/Booking-System

- Implemented **JWT-based authentication** with **role-based access** for admins, business owners, and customers.
- Integrated **Stripe** for secure **online payments** and implemented **customer reviews** and **rating** functionality.
- Built admin features for monitoring **users**, **businesses**, and **bookings** with **reporting** and **analytics** capabilities.

Beauty Skincare Ecommerce | *Python, Django, JavaScript, HTML, CSS, SQLite*

github.com/chrispsang/Beauty-Skincare

- Built an **ecommerce** platform with **user authentication**, **product listings**, **cart**, and **order management**.
- Developed the backend using **Django** with secure **APIs**, **authentication**, and **database schema** design.
- Built a **responsive frontend** using **HTML**, **CSS**, and **JavaScript** with **dashboards**, **search**, and **checkout**.

Churn Analysis Project | *Python, Jupyter Notebook, Tableau, scikit-learn, matplotlib*

github.com/chrispsang/CustomerChurnAnalysis

- Built and evaluated a **RandomForestClassifier** to **predict customer churn** for a subscription service.
- Performed **data preprocessing** and **EDA**, visualizing **churn distribution** and **feature correlations**.
- Created **Tableau dashboards** highlighting **key churn drivers** and **retention opportunities**.

TECHNICAL SKILLS

Programming Languages: Java, C, SQL, JavaScript, HTML/CSS, Python, TypeScript, Bash Scripting

Frameworks: Node.js, Express.js, React.js, AngularJS, Django

Databases: MySQL, PostgreSQL, Firebase, Supabase

Tools: Linux, Git, Docker, Figma

Data Visualization: Tableau, PowerBI, Excel

LANGUAGE SKILLS

Bilingual in English and French
